Boral Timber Flooring

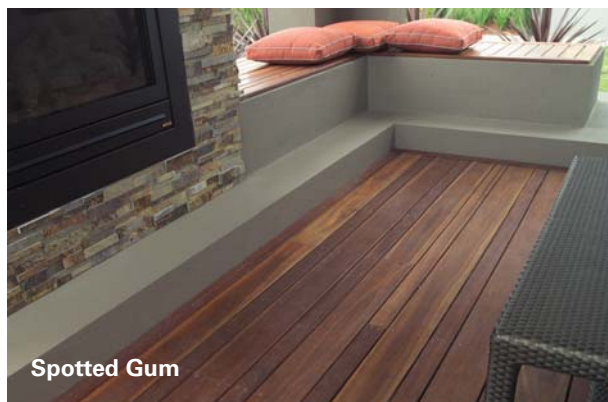

THE NATURAL SELECTION

## TEN REASONS TO CHOOSE AUSTRALIAN MADE DECKING

Blackbutt

- Outdoor decking from Boral Timber is produced by an Australian company with over a century of experience.
- Native Australian species are better suited to Australian outdoor conditions.
- Blackbutt and Tallowwood are as hard, if not harder and more durable than other imported species such as Merbau.
- Australian species are in excellent supply. As rainforests become protected, less Merbau will be available in the future.

Spotted Gum

### SPECIES AVAILABLE

- Blackbutt
- Mixed Hardwoods
- Spotted Gum
- River Reds
- Tallowwood

Available in a variety of sizes and other species

River Reds

- Blackbutt and Spotted Gum have natural bush fire retardant properties with many Australian species also naturally termite resistant.
- Australian species offer a greater variety of colour choice and match well with internal hardwood timber flooring.
- Can be used for a variety of applications such as decking, fencing, screening and seating.
- Australian-made decking from Boral Timber has a quality assurance system that ensures strict tolerances and drying procedures for top quality decking.
- Buying locally grown and manufactured timber means that a new deck has a smaller carbon footprint.
- Boral decking is Chain of Custody certified to Australian Forestry Standard (AS 4708-2007).

# TOUGH STUFF

Before

After

## LONGLIFE EXTERIOR TIMBER PROTECTION

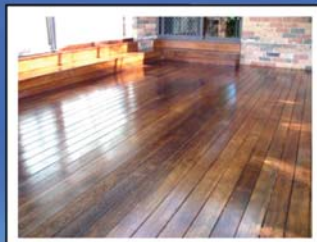

- Up to 18 m<sup>2</sup>/litre coverage
- More coverage than other brands
- Minimal maintenance, Easy to Apply
- Huge savings, No yearly re-coating
- Touch dry 10 minutes Re-coat after 2 hours
- Eco friendly. Low VOC. No odour
- Maximum UV protection
- Mould and fungus inhibitors
- Reduces tannin leaching
- Clean up with water
- Developed for all Australian conditions
- Enriches & beautifies all natural timber

# ultra

## TIMBERGUARD

UP TO 8 YEARS LONG LIFE - EXTERIOR TIMBER PROTECTION

**Ultra V - Timberguard™ is the latest generation of water-based polyurethane timber coating. Specially formulated for long life durability and specifically developed for the harsh Australian weather conditions.**

### Natural Tones

A clear semi transparent pigmented/oxide, water based polyurethane that has been designed to protect and enhance timber and fibrous products for exterior and interior use. It produces a beautiful transparent natural finish for new timber or, rejuvenating previously stained, oiled or painted timber.

### Matt Finish

- Natural Tone
- Natural Clear

LITRES	PRICE
1	\$56.06
4	\$179.38
10	\$437.24
20	\$762.36

### Natural Clear

A totally transparent and clear timber finish (non pigmented) for the protection of all exterior or interior timber such as doors, windows and wall paneling.

### Gloss Finish

- Natural Tone
- Natural Clear

LITRES	PRICE
1	\$51.58
4	\$168.17
10	\$403.60
20	\$717.52

### Step on Slip-Resistance Grit

DESCRIPTION	PRICE
Grit Type - Small 80g Use 80g of Grit for 4Ltrs of Ultra V	\$22.08*
Grit Type - Small 200g Use 80g of Grit for 4Ltrs of Ultra V	\$41.40*
Grit Type - Medium 80g Use 80g of Grit for 4Ltrs of Ultra V	\$23.45*
Grit Type - Medium 80g Use 200g of Grit for 4Ltrs of Ultra V	\$43.98*

\* Prices are per container

• All Prices are Ex Yard and Delivery.

• Any claim must be advised within 30 days of receipt of goods

### HD Exterior Timber Preparation Cleaner

LITRES	PRICE
1	\$13.86 per container
4	\$36.38 per container

# FIN'S FACTS ABOUT DECKING

## Decking

**Verandahs and decks are perfect for our Queensland climate, providing 'bridges' between indoors and outdoors - and wider lifestyle choices. It's important to remember however, that decking is often at the mercy of the elements - and needs to be done right. Here's our resident expert Fin's advice on how to construct (and/or lay) decking:**

The first things to check when renovating a deck are the basic structural components such as the posts, bearers and joists on your verandah. If these need replacing, Fin recommends using a durable species such as Iron Bark or Spotted Gum for these applications. These items will be supplied GOS (Green Off Saw) because it's not really necessary to go to the added expense of kiln drying. Make Finlayson's aware that you are ordering your timber for the one structure, so that they can ensure it's all of the same species. If your materials are of a variety of species they will acclimatise at varying rates which may cause an uneven deck at the end of the day.

If your verandah is fully exposed to the elements, Fin suggests Iron Bark, Spotted Gum or Merbau. All of these species are extremely durable and will provide many years of service if well maintained. If it is well protected you may choose deckings such as Treated Pine or Blackbutt.

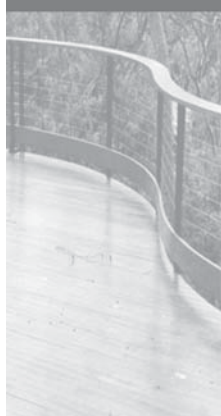

When laying your deck, it is important to space boards with an appropriate gap. Fin recommends somewhere between 3mm and 5mm, depending once again on the position of your verandah. The greater exposure to the elements, the greater the gap to speed up the drying process after the rain. When laying your boards, use the correct nail size.

Fin suggests a 50 x 2.8 Gal Bullet Head that is not punched but just hand nailed flush with the deck. Fin also suggests that when nailing, stagger the nails for two reasons.

Firstly, appearance-wise, it looks smarter and secondly, the joists that you are nailing into will be less likely to split, reducing the chance of water penetration.

Finally, Fin's last bit of advice - make the effort to prime the tops of the joists with an oil-based primer prior to laying your deck. This will reduce the moisture uptake and lengthen the life of your verandah.

**Whether you're renovating an older home, or building a new one in the traditional style - there are many advantages in belonging to Finlayson's Renovator's Club. As a member, you'll receive special deals on our products and services, as well as access to helpful workshops and seminars.**

Finlayson's are proud to stock DNA decking from Simmonds.

By purchasing Simmonds Decking you can be assured that:

- Helping to stop illegal logging
- Your timber is fully DNA certified
- There is a Chain of Custody
- Merbau Timber
- FSC certification pending

### 10.1B MODWOOD DECKING

MODWOOD DECKING			
CODE	SIZE	Description	Price Each
PRICE = per length each			
MOD088	88 x 23	Modwood Decking 5.4m length	\$57.34
MOD137	137 x 23	Modwood Decking 5.4m length	\$92.62

### 10.2 PINE DECKING

SIZE	Description	Grade	Price
Unit = LM			
70 x 22	Reeded Reverse	Knotty	\$2.08
90 x 22	Reeded Reverse	Knotty	\$2.15

### 10.3 HARDWOOD SCREENING MATERIAL

SIZE	Description	Price
Unit = LM		
PENCIL ROUND MIXED HARDWOOD - SET LENGTH		
42 x 19	0.9 - 3.0 (0.3 increments)	\$3.80
64 x 19	0.9 - 3.0 (0.3 increments)	\$5.08

**Please Note:**

Hardwood decking predominantly ironbark and spotted gum. Hardwood decking available random lengths. Set length availability and pricing on application. Boards are pencil rounded to ensure no sharp edges on feet. Job lot surcharges apply for some species - please ask your Finlayson's representative for details. All species subject to availability at time of ordering. All products are graded with the relevant Australian Standards. Spotted gum may contain treated sapwood. Please ask your Finlayson's representative for correct handling, storage and fixing recommendations. For correct handling, storage and fixing instructions for timber decking, please refer Timber Qld Technical Data Sheet #4 on Page 195 of this catalogue.

## New Natural Grain Collection Release!

Australia's only manufacturer of wood composite decking has gone one better with a new range of natural colours!

Australia's No. 1 choice for wood plastic composites • Low maintenance and highly durable • Uses approximately 90% recycled or reclaimed materials in manufacture • Easy installation • Withstands the harsh Australian environment and is termite resistant

The Natural Grain Collection is inspired by the colours and grains found in natural timbers, and was created in direct response to consumer feed back for products that closely resemble timber. The new colours closely resemble the timber species that have inspired their names, and include **Black Bean** (dark mocca), **Jarrah** (red/brown) and **Silver Gum** (silver/grey).

The Natural Grain Collection will be available in solid wide (137x23mm), solid (88x23mm) and Marina (heavy duty 137x32mm) boards. The new colour range will complement the existing range of Tallowwood (mid-brown), Redwood (reddish) and Grey timber composite decking boards, with the boards having been specifically designed to fit the Kleva Klip concealed fixing system.

The Natural Grain Collection will have an embossed (grain) finish on the surface of both faces of the board. One face will be smooth and the reverse will be brushed.
