Cladding

An exterior cladding system with a geometric, expressed-jointed look. Fast and simple to install, it creates the commercial look without the price tag. For residential and medium-density applications.

A vertically grooved cladding panel that looks sharp and smooth. Pre-primed and easy to install, it creates a pristine look that lasts. For residential applications.

A wide cladding board, with a 15mm horizontal joint, that has the classic appeal of decorative render. Pre-primed and easy to install, it is the fast way to achieve a timeless look. For residential applications.

A 16mm thick horizontal weatherboard, with deep shadow lines, that has the look of traditional weatherboard without weathering like one. For residential applications.

The finishing touch

A thick and versatile trim that's the easy way to add finishing touches that keep their finish. For window edge treatments, finishing touches to internal and external corners, and a durable batten over butt joints.

Flooring

A heavy-duty but lightweight structural flooring substrate that does double duty – it can be easily used for tile, vinyl and carpet finishes over timber or steel floor joists in both residential general interiors and wet areas as an alternative to particleboard, plywood or compressed fibre cement. Simple and fast to install, it's the easiest way to get top protection against moisture damage in all interior floors.

An external structural flooring substrate for tile finishes over timber or lightweight steel floor joists. Simple and fast to install, it helps give you peace of mind against moisture damage to balconies. For tiled residential balconies.

* When installed and maintained correctly and to the extent set out in James Hardie's published literature current at the time of installation. Can be gun nailed for face fixing only.

Scyon™ is the advanced lightweight cement composite with the heavy-duty performance. Not only is it resistant to damage from termites, rot and fire,* but it can also be gun nailed and is easy to cut – like timber.

SCYON™ LINEA™ WEATHERBOARD,
THE WEATHERBOARD THAT DOESN'T WEATHER

www.scyon.com.au

LOOK AT FINLAYSON'S

This 16mm thick horizontal weatherboard has the shadow lines of a traditional weatherboard without the weathering. Unlike some timber, Linea weatherboard will resist shrinking, swelling and cracking* to hold paint longer than wood, and can also be painted dark as well as light colours. There's also a 15-year paint warranty when painting Wattyl Solagard® or Taubmans All Weather® and Sun Proof Max® on Linea weatherboard.

**When installed and maintained correctly.*

SCYON™ STRIA™ CLADDING DELIVERS A ROBUST YET
REFINED FLAVOUR TO YOUR HOME

Look at STRIA™

www.scyon.com.au

LOOK AT FINLAYSON'S

Faster than laying bricks, rendering, scoring and painting (with all the associated mess and scheduling of different trades), Stria™ cladding is the simple, speedy way to get a classic but modern look. With a shiplapped joint on the extra-wide board it can easily be concealed or face fixed and joined on or off stud. There's also a 15-year paint warranty on when painting Stria™ cladding with Watty Solagard®.

Look at AXON™

SCYON™ AXON™ CLADDING, FOR
A CRISP LOOK DESIGNED TO LAST

LOOK AT FINLAYSON'S

The stepped shiplap on the long edges of Axon™ cladding means sheets are easily installed. Paint application is fast because the pre-primed sheets mean less paint and time is needed to achieve a high-quality finish. Made from Scyon™, it will resist shrinking, swelling and cracking* to hold paint longer than wood, and can therefore be painted dark as well as light colours.

**When installed and maintained correctly.*

SCYON™ MATRIX™ CLADDING, THE QUINTESSENTIAL
UNDERSTATEMENT OF SOPHISTICATED LIVING

Look at MATRIX™

www.scyon.com.au

LOOK AT FINLAYSON'S

Instead of needing the steel top hats associated with many commercial systems, Matrix cladding sheets are installed with Scyon™ cavity trim battens. The expressed joint is created easily using a 10mm packer. Sheets are sanded smooth and pre-primed for fast paint application and a high-quality finish. Matrix cladding's resistance to cracking, warping and swelling* means it can be painted both dark and light colours.

**When installed and maintained correctly.*

SECURA™ EXTERIOR FLOORING

What is it?

An external structural flooring substrate for ceramic tile finishes over timber or lightweight steel floor joists. Simple and fast to install, Scyon™ Secura™ exterior flooring helps give you peace of mind against moisture damage to balconies.

Where do you use it?

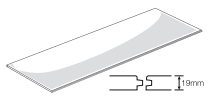

As an external substrate for tiled residential balconies and as an alternative to particleboard, plywood or compressed fibre cement.

WHAT ARE THE KEY BENEFITS?

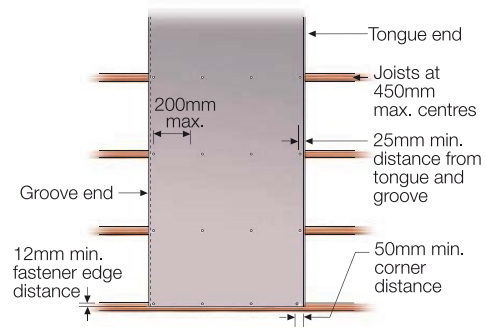

SECURITY. Secura external flooring is sealed on all sides with an advanced polymer coating that helps protect the board from moisture-related problems. A topcoat on the surface of the board provides good adhesion. The mesh reinforcement on the underside enhances the heavy-duty performance of the Scyon™ material, adding extra strength and impact resistance to deliver a suitable external residential flooring substrate.

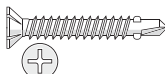

EASY TO INSTALL. At about 40kg and 2,700mm long by 600mm wide, Secura exterior flooring is about 20% lighter than compressed sheet (per square meter) and can be carried by two people, tucked under the arm and carried like a large surfboard. It's also tongued and grooved, which delivers engineered joints and eliminates the need for timber trimmers under these joints.

SPEED. For balconies that aren't over habitable rooms - verandas for example - no additional waterproofing membrane is needed once Secura exterior flooring is installed. For balconies over habitable rooms, a waterproofing system needs to be applied.

Secura exterior flooring	
Product	Description
	Size: 19 x 600 x 2,700mm Approx. mass: 40kg

Secura exterior flooring fastener layout

Accessories	Description
	James Hardie Joint Sealant Polyurethane joint sealant for sealing of all sheet joints. PC: 300753
	HardiBlade® Saw Blade Ø185 poly diamond blade, for fast, clean cutting of Secura exterior flooring. PC: 300660
	HardiDrive® Screw For fastening to 0.75mm - 1.6mm BMT steel frames. Class 3 finish. Length 40mm. PC: 300635

COMPONENTS NOT SUPPLIED BY JAMES HARDIE	
Accessories	Description
	Nails 50 x 2.8mm corrosion-resistant fibre cement nails. 50mm corrosion-resistant D Head gun nails.

TOP PROTECTION AGAINST MOISTURE DAMAGE
IN ALL INTERIOR FLOORS

www.scyon.com.au

LOOK AT FINLAYSON'S

Able to be gun-nailed, cut like timber, with a tongue and grooved joint and 15% less weight than conventional 15mm compressed*, SecuraTM interior flooring can also be up to 40% faster to install. Tiles and vinyl can be directly fixed without an underlay sheet and a sealer on all sides boosts the moisture-resistant properties of the ScyonTM material for top protection in all interior floors, including wet areas.

**Per square metre.*
